

AC GUARDIAN™

Flasher Cabinet Monitor

RTC's AC Guardian™ monitors and alerts users of existing and potential problems with time switches, AC power, and AC lamps located in flasher systems or other electronic devices. Alerts are sent via text or e-mail to an unlimited number of recipients and are configured to send around-the-clock or only during user-defined business hours.

AC GUARDIAN™ MONITORING CAPABILITIES:

- Time Switch** | Continuously monitors the internal time switch voltages and issues an alert if the time switch loses power.
- AC Power** | Continuously monitors AC power and issues an alert if power is interrupted or lost.
- AC Lamps** | Continuously monitors AC lamps and sends an alert if an AC lamp burns out or is vandalized.
- Door** | Continuously monitors the status of the cabinet door and issues an alert indicating when the door is opened. A door switch is required.

AC GUARDIAN™ FEATURES:

- **Designed for most AC cabinet installations**
- **Multiple mounting brackets available for various cabinet sizes and spaces**
- **Dimensions:** Width: 4" | Height: 5.75" | Depth: 2"

The AC Guardian™ is designed to work in conjunction with RTC Connect™, RTC time switches, and RTC M2M modems.

School Zone Safety Since 1987
