

GATE OPENER SYSTEM

Open and Close Gates Remotely via RTC Connect™

M2M modem
attached to RTC's
AP22 Time Switch

The RTC Gate Opener System can manually or remotely open and close gates using a relay. The system can be activated through RTC Connect™ on a phone, tablet or computer. The software provides an easy user-interface as well as a record log of gate open and close commands.

FEATURES

- Open and close gates manually on keypad or remotely from software
- Management software can be used on mobile phone, tablet or computer
- Users can be created to log who issued gate open/close commands, at what time, and to which gates
- User credentials can be given with different permissions to share with city officials, traffic, fire, police, and dispatch
- Software can stand alone for gates or integrate into agency's existing RTC Connect™ system for other warning and flasher systems
- Optional Guardian™ device to monitor cabinet door, power, and time switch power

SPECIFICATIONS

- Utilizes RTC Manufacturing's M2M cell modem and AP22 Time Switch
- Optional AC/DC Guardian™ device
- Cabinet Size: 12"W x 16.125"H x 10"D
